**OCEANIC CONSULTING CORPORATION & MEMORIAL
UNIVERSITY ALUMNI NIGHT AT OTC IN HOUSTON, TEXAS**

Oceanic Consulting Corporation and the MUN Alumni Association are pleased to announce the outstanding success of our joint reception on May 1st, 2005 in conjunction with the Offshore Technology Conference in Houston, Texas.

Dr. James A. Wright, Director, Major Research Partnerships, Office of the Vice President (Research), brought greetings to the delegation on behalf of Memorial University, followed by a warm welcome and presentation by Dr. Dan Walker, President of Oceanic Consulting Corporation.

Dr. Walker praised Memorial and its Alumni saying that "Memorial graduates are the brightest and most talented in the world – bar none. The level of knowledge, innovation and energy that MUN Alumni possess has been a major resource to Oceanic and to the global offshore industry. Oceanic is proud to employ and work with many MUN graduates and I feel that you are an invaluable asset not only to our business and our industry, but to our world as well."

The event attracted over 100 MUN Alumni, industry professionals and government officials and showcased Oceanic's projects and advancements in the offshore industry over the past year. Oceanic was pleased to announce that it had participated in the development of a novel dynamic positioning system for the *SeaRose FPSO*, made significant advancements in the prediction of vortex induced vibration on deep water risers and evaluated liquefied natural gas terminals for several major US oil companies & contractors.

Oceanic has been fortunate to have had the opportunity to work on such projects over the past year and will continue to encourage, support and employ talented MUN graduates making impacts at home and abroad in the offshore industry.
